EDUCATION

Cornell University

Ithaca, NY

Bachelor of Science in Information Science, Systems, and Technology

Expected Graduation: May 2027

Relevant Coursework: Machine Learning, Object-Oriented Programming, Data Structures, Algorithms, Networks, Java, R, Python, Web Development, iOS Development, Linear Algebra, Multivariable Calculus, Differential Equations

EXPERIENCE

IBM watsonX Orchestrate (Enterprise AI Orchestration Platform)

San Jose, CA

Software Developer Intern

May 2026 – August 2026

- Engineered and validated a distributed, multi-agent orchestration system across 400+ scenarios involving multi-step reasoning, external tool calls, policy enforcement, and MCP-based integrations
- Built and configured MCP server integrations connecting orchestrated agents to external APIs and infrastructure, using AI-assisted development tools to accelerate implementation while manually validating behavior and integration correctness before deployment.
- Architected a Playwright-based automation framework covering 30+ test cases across embedded chat, MCP tooling, and AWS-backed services, reviewing test coverage with senior engineers to ensure safe, reliable updates across a large-scale, multi-component system.

Shop Online New York

Yonkers, NY

Software Engineer Intern

Aug 2025 – Dec 2025

- Architected 15+ reusable React components and structured state-management patterns, reducing development time 33% across feature development.
- Integrated 20+ backend APIs with cross-functional teams, implementing data validation and error handling that contributed to a 27% increase in user engagement
- Led systematic peer code reviews and refactored legacy code, improving page load speed 44% for thousands of active users while maintaining safe deployment practices in a production codebase.

Cornell University Sustainable Design (CUSD)

Ithaca, NY

Tech Lead & Web Developer

Sep 2024 - Present

- Designed and deployed a responsive website from scratch, growing traffic to 1,000+ monthly visitors and boosting public visibility 50%.
- Directed technical strategy and oversight for the organization's web presence, as measured by accurate representation of all 11 subteams' work, by managing site architecture and content to communicate CUSD's sustainability initiatives and impact to the broader community.

Pi Delta Psi Incorporated

Ithaca, NY

Vice President & Web Developer

Oct 2024 - Present

- Maintained a React.js production-quality web platform, measured by 250+ monthly visitors and a 60% increase in online engagement, deploying on Vercel with CI/CD pipelines for reliable updates and consistent user experience.
- Optimized site performance and SEO, as measured by an 60% increase in traffic, by implementing Next.js best practices for load speed, indexing, and scalability.
- Oversaw chapter logistics and 10+ board positions, as measured by strengthened Asian American campus presence, by directing community service, cultural, and social programming for 50+ members.

PROJECTS

EKN Answer Synthesis Layer | *watsonX Orchestrate, Python, Milvus, RAG, LLM Agents, Semantic Search*

- Reverse-engineered a 270-line agent instruction set with no documentation to diagnose a synthesis gap in a production RAG system spanning 13 Milvus collections, 5,900 entities, and 5 live client engagements; authored and pitched a solution projected to reduce manual result triage 50%.
- Developed an internal LLM troubleshooting agent by authoring a technical PRD with AI-assisted development tools, manually validating generated outputs and domain assumptions before stakeholder review.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, R, Swift

Frameworks: React, Next.js, Node.js, Express.js, Spring

Infrastructure & Tools: WS, Docker, Kubernetes, Git, Playwright, MCP

Databases & Data: PostgreSQL, MongoDB, Milvus, Pandas, NumPy
